Early comments on *The Protection of Intellectual Property Rights under International Investment Law*

"In the early pages of the book, the authors mention how litigation of IP-based investment disputes is complicated by the fact that arbitrators often do not have an IP background. This book certainly fills this void. Whether you are an IP specialist with limited knowledge of investment law or an expert on ISDS who needs to familiarise himself with the specificities of IP-based cases, this book will provide answers to your questions in an advanced, yet understandable, manner."

- Anastasiia Kyrylenko, *IPKat*
